PREFACE

The improvement and availability of basic education programs for adults is essential to the progress, security and well-being of the State of Wyoming.

Data provided by the U. S. Census Report indicated that in 1960 there were 49,867 persons completing not more than the 8th grade in Wyoming. Of these persons, 29.9 were adults twenty-five years of age and older.

The Wyoming Department of Education has been administering federal funds made available to local school districts for the development of adult basic education programs since February 18, 1966.

This document is an annotated bibliography of curriculum materials, machines, and equipment available to assist adult basic education students. The materials listed are arranged alphabetically by author under subject heading. They are indexed by author, title, and publisher. This is an attempt to provide a comprehensive list of available materials and is in no way intended to be a limited or an approved list.

This bibliography was prepared by the Adult Reading Center of the Kalamazoo, Michigan library. We are indeed grateful to Mrs. Marion Spencer, head of the Adult Reading Center; Mr. Mark Crum, director of the Kalamazoo library system and the Michigan Department of Education for allowing the Wyoming Department of Education, Adult Basic Education Division, to reproduce this bibliography.

The Wyoming Department of Education has a great interest in expanding and improving adult basic education programs. This document was published in order to be of assistance in that effort.
